| A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). | | | | | | | |

DETAILED ACTION

1. Claims 1-20 were originally presented for examination and rejected.

- 2. Claims 1-20 were cancelled and therefore withdrawn from consideration.
- 3. Claims 21-22 are currently pending in Instant Application.
- 4. The Instant Application is not currently in condition for allowance.

Priority

5. Priority is not claimed (12/29/03).

Response to Arguments

6. The 35 USC §101, §112, §102, and §103 rejections have been mooted by Applicant's cancellation of all Previously Presented Claims.

Claim Interpretation

7. Limitations drawn to allowing, enabling or making optional a function's performance does not further limit a claim. As such, any prior art not explicitly prohibiting the performance of the function inherently anticipates the limitation. Additionally, limitations such as "adapted to", "adapted for", "configured to" do not further limit the claim because they do not necessitate the function or structure. See MPEP 2111.04.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

- 8. Claims 21-22 are rejected under 35 U.S.C. 101 because the claimed invention is directed to nonstatutory subject matter.
- 8.1 In this instance, absent an explicit and deliberate definition in the specification that the product includes an appropriate medium or hardware elements, the claims are directed to software, per se.
 Note exemplary claim 21 which recites only software elements. Additionally, software, per se, is not considered concrete.

Claim Rejections - 35 USC § 102

Application/Control Number: 10/747,967 Page 3

Art Unit: 2128

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- Claims 21-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Zelig et al. (US 20040037279 A1).

Zelig discloses: 21. An intermediate node in a multihop pseudo-wire comprising:

a forwarder logical entity configured to: terminate a first pseudo-wire segment of said multihop pseudo-wire, where a description of said first pseudo-wire segment includes, as a target, an attachment individual identifier associated with said forwarder; originate a second pseudo-wire segment of said multihop pseudo-wire, where a description of said second pseudo-wire segment includes, as a source, said attachment individual identifier associated with said forwarder (forwarding logic ... Fig 1, 2 (item 34 "forwarding engine") and Figs' descriptions; individual identifier ... Fig 4 5 and their descriptions).

Zelig discloses: 22. An intermediate node in a multihop pseudo-wire comprising:

a first forwarder logical entity configured to terminate a first pseudo-wire segment of said multihop pseudo-wire, where a description of said first pseudo-wire segment includes, as a target, an attachment individual identifier associated with said first forwarder; and a second forwarder logical entity configured to originate a second pseudo-wire segment of said multihop pseudo-wire, where a description of said second pseudo-wire segment includes, as a source, an attachment individual identifier associated with said second forwarder (forwarding logic ... Fig 1, 2 (item 34 "forwarding engine") and Figs' descriptions; individual identifier ... Fig 4 5 and their descriptions; the figure has at least two routers, each of which has a first forwarder logic and second forwarder logic.).

Art Unit: 2128

Claims 21-22 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Anthony J. Li et al.
 (US 5,473,599).

Zelig discloses: 21. An intermediate node in a multihop pseudo-wire comprising:

a forwarder logical entity configured to: terminate a first pseudo-wire segment of said multihop pseudo-wire, where a description of said first pseudo-wire segment includes, as a target, an attachment individual identifier associated with said forwarder; originate a second pseudo-wire segment of said multihop pseudo-wire, where a description of said second pseudo-wire segment includes, as a source, said attachment individual identifier associated with said forwarder (col: 8 line: 19-23; col: 2 line: 16-30).

Zelig discloses: 22. An intermediate node in a multihop pseudo-wire comprising:

a first forwarder logical entity configured to terminate a first pseudo-wire segment of said multihop pseudo-wire, where a description of said first pseudo-wire segment includes, as a target, an attachment individual identifier associated with said first forwarder; and a second forwarder logical entity configured to originate a second pseudo-wire segment of said multihop pseudo-wire, where a description of said second pseudo-wire segment includes, as a source, an attachment individual identifier associated with said second forwarder (col: 8 line: 19-23; col: 2 line: 16-30).

Conclusion

- 11. All claims are rejected.
- 12. The Instant Application is not currently in condition for allowance.
- 13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 10/747,967 Page 5

Art Unit: 2128

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Silver whose telephone number is (571) 272-8634. The examiner can normally be reached on Monday thru Friday, 10am to 6:30pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kamini Shah can be reached on 571-272-2279. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application

Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
